Art Unit: 1722

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. An ophthalmic mold made of a shape memory polymer

II. An ophthalmic mold made of a shape memory alloy

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant

Art Unit: 1722

must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Species I directed to the shape memory polymer contains claims directed to the following patentably distinct subspecies of the claimed invention:

I. A mold wherein the shape memory polymer is a norbornene homopolymer

II. A mold wherein the shape memory polymer is a copolymer of norbornene and alkylated imidies

III. A mold wherein the shape memory polymer is a copolymer of norbornene and cyanoimides

Art Unit: 1722

IV. A mold wherein the shape memory polymer is a copolymer of norbornene and alkoxyated imides

V. A mold wherein the shape memory polymer is a copolymer of norbornene and mono- or diesterified imides

VI. A mold wherein the shape memory polymer is a copolymer of norbornene and a carboxylic acid derivative

VII. A mold wherein the shape memory polymer is a copolymer of norbornene and dimethane octahydronaphthalate

VIII. A mold wherein the shape memory polymer is a copolymer of styrene and a vinyl compound

If Species I is elected above, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be

Art Unit: 1722

restricted if no generic claim is finally held to be allowable. Currently, claims 1-4 and 6-26 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or

Art Unit: 1722

admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Heckenberg whose telephone number is (703) 308-6371. The examiner can normally be reached on Monday through Friday from 9:30 A.M. to 6:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda Walker, can be reached at (703) 308-0457. The official fax phone number for the organization where this application or proceeding is assigned is (703) 872-9310 for responses to non-final action, and 703-872-9311 for responses to final actions. The unofficial fax phone number is (703) 305-3602.
